

Why you need a health monitoring system

The Honewell HomMed health monitoring system collects vital health information and sends it automatically to a registered professional nurse for daily review – all from the comfort of your own home. Best of all, it takes just five minutes a day and no appointment is needed.

- Catch medical changes early
- Reduce the likelihood of Emergency Room visits and hospital admissions
- Receive professional guidance so you can make informed decisions about you or you loved one's health.

Who can benefit from daily in-home health monitoring?

- Active seniors who want to take charge of their health
- Anyone with a chronic condition such as hypertension, diabetes, heart failure, COPD
- Those looking for peace of mind for themselves and their loved ones
- People recently discharged from the hospital

Providing daily monitoring with the Honeywell HomMed and Health monitoring System and MedPartner® is another way South Jersey HealthCare Help Services is striving to improve healthcare in the community.

chore services.

SJH Help Services

South Jersey Healthcare Help Services is a program of South Jersey Healthcare Community Services. It was formed to help area residents with home and personal chores.

Anyone needing an extra hand around the house to help with housework, personal care, or chores will find the needed assistance at SJH Help Services.

This service is helpful for working caregivers, children of elderly parents, shut-ins, people with busy schedules and anyone who may need some help at home. We can provide you with: homemakers, personal care assistants, house cleaning services, handyman services, and shopping services.

SJH Help Services is a private-pay company providing services at competitive and affordable rates to residents of South Jersey.

Services are provided by bonded employees who usually have many years of experience. Services include:

- **Personal Care Service** - a service for the provision of bathing, grooming and dressing.
- **Homemaker Service** - provides help with activities of daily living and companionship to individuals, meal preparation, grocery shopping, accompaniment to physician appointments, etc.
- **House Cleaning Service** - includes home maintenance such as dusting, vacuuming, laundry and other functions as determined by client and Help Services.
- **Handyman Service** - provided to persons in need of minor household repairs, painting, lawn and yard care.
- **Shopping Service** - provides assistance with individual shopping needs, i.e. groceries, medications.

Who Do We Serve?

At South Jersey Healthcare Help Services, we accommodate our clients' individual needs by matching them with caregivers who provide personal care, companionship and homemaking suited for their situation. We support those who are:

- Unable to manage on their own
- Alone or at risk for losing their independence
- In need of assistance with activities of daily living
- Living far away from their families
- Recovering from a hospital, rehabilitation or nursing home stay

SJH Help Services is committed to providing the best care for our clients to keep them at home, healthy and free from danger throughout all life stages.

About SJH Community Services

In addition to Help Services, SJH Community Services specializes in home care, hospice care and adult day programs. Located at Broadway and Walnut in Salem, New Jersey, SJH Community Services has been serving area residents for nearly forty years.

Health Monitoring System

South Jersey HealthCare Help Services has partnered with Honeywell, the leading supplier of Home Telemonitoring devices, to improve health care in our community.

The HomMed Health Monitoring system is an excellent tool for proactive health care. By regularly monitoring your vitals and other test results, your health care provider can identify trends that could signal the need for preventative intervention.

When used as part of an overall health plan, the HomMed Health Monitoring System may reduce Emergency Department visits and hospital admissions, and dramatically improve your quality of life.

The Health Monitoring System includes the monitor, scale, blood pressure cuff and finger sensor. During a monitoring session, voice prompts walk you through a series of short, easy steps to collect your vitals. The monitor then transmits your information to the monitoring center where qualified clinicians review your information. The entire process takes only a few minutes, and all transmitted information is completely confidential.

The MedPartner automatically reminds patients when it's time to take their medications, the number of pills and the appropriate bottle.

Each system is offered on a monthly lease basis. A set up fee applies.
